

# ABSTRACT

Disclosed is a resin composition that has excellent impact resistance and excellent heat resistance without substantially deteriorating biodegradability that the lactic acid based resin has inherently. The resin composition includes (A) a lactic acid based resin; (B) an aromatic aliphatic polyester having a glass transition temperature ( $T_g$ ) of  $0^{\circ}\text{C}$  or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and/or an aliphatic polyester other than the lactic acid based resin, having a glass transition temperature ( $T_g$ ) of  $0^{\circ}\text{C}$  or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and (B) an aromatic aliphatic polyester having a glass transition temperature ( $T_g$ ) of  $0^{\circ}\text{C}$  or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, and/or an aliphatic polyester other than the lactic acid based resin, having a glass transition temperature ( $T_g$ ) of  $0^{\circ}\text{C}$  or less and a heat of crystal melting ( $\Delta H_m$ ) of 5 J/g to 30 J/g, has a content of 5 mass% to 25 mass%.
